Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/567,133	Applicant(s) KOOP ET AL.	
	Examiner Mark Rosenbaum	Art Unit 3725	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

Claims 1,2,4,5,7,13 are rejected under 35 U.S.C. 102(b) as being anticipated by Samosky et al. Figure 3 shows a mixing/comminuting shaft having a steel core and a plastic type coating, the mixing elements of the shaft being integral with the coating.

Claim Rejections - 35 USC § 103

Claims 2,3,6,8-12,14,15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Samosky et al. The limitations of these claims would have been obvious design choices only once the basic shaft was known. For example, the use of PTFE as the coating material, if not inherent in the patent, would have been obvious since this type of material is well known as a coating for steel for the inherent advantages. Also, the exact fastening means for the shaft in relation to its drive means would have been a design choice only once its use was known.

Claims 16-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over APA in view of Samosky et al. APA is the process discussed in the third paragraph of page 4 of applicant's specification. APA is the known process of the isotatic pressure and temperature placement of Teflon coating onto steel surfaces. APA does not discuss the integral attachment and coating of mixing elements on a steel shaft. Samosky et al shows such a process. In order to strengthen a mixing shaft, it would

have been obvious for one of ordinary skill in the art to modify APA by integrating the mixing elements with the coating and shaft, taught to be desirable by Samosky et al. The remaining limitations would then have been obvious process choices by one of ordinary skill in the art.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
